[1.1 Remittances in Ukraine](#)

[1.2 Remittances in Ukraine by major countries](#)

[1.3 Remittances in Ukraine by official channel](#)

According to the Rules for the organization of statistical reporting submitted to the National Bank of Ukraine during a special period, approved by Resolution of the Board of the National Bank of Ukraine № 140 dated December 18, 2018, information on cross-border transfers received in Ukraine using international money transfer systems was not collected in February-April 2022. The estimation of private remittances to Ukraine for 2022 is based on the available information, which lacks the data details by country.

The remittances data for 2024 were revised following a revision of the data by the National Bank of Poland

* According to the Rules for the organization of statistical reporting submitted to the National Bank of Ukraine during a special period, approved by Resolution of the Board of the National Bank of Ukraine № 140 dated December 18, 2018, information on cross-border transfers received in Ukraine using international money transfer systems was not collected in February-April 2022. The estimation of private remittances to Ukraine for 2022 is based on the available information.

Note 1: Detailed information about methodology and results of the review is available at https://bank.gov.ua/control/uk/publish/category?cat_id=44001331.

Note 2: Since 2014, data exclude the temporarily occupied by the Russian Federation territories of Ukraine.

Remittances represent household income from foreign economies arising mainly from temporary or permanent migration of people to these economies (BPM6, A5.1).

Remittances include cash and noncash items that flow through formal channels, such as via electronic wire, or through informal channels, such as money or goods carried across borders.

Remittances are mainly derived from two items in the balance of payments framework: income earned by workers in economies where they are not resident (or from nonresident employers) and transfers from residents of one economy to residents of another.

These standard components are presented in the current account.

Remittances include: net compensation of employees; personal transfers.

Compensation of employees represent income of of border, seasonal, and other short-term workers who are employed in nonresident economy less than one year and of residents employed by nonresident entities .

Net compensation of employees is the difference between the compensation of employees that workers receive from temporary employment abroad, and taxes and other expenses incurred in the host country.

Personal transfers consist of all current transfers in cash or in kind received by resident households from nonresident households. They consist of remittances of workers who work more than a year, and other private transfers between residents and nonresidents

1.2 Remittances in Ukraine by major countries

by official and unofficial channels
